DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on December 10, 2003, which has been fully considered in this action.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13, 14, 18-21, 24, 28 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2316447.

The preamble elements are in a Jepson-type claim and are impliedly admitted to be old in the art. GB 2316447 shows an injector and teaches the improvement of the closing piston 3 having a larger diameter than the nozzle needle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the closing piston as claimed in the Jepson-type preamble, since GB 2316447 teaches the improvement of the closing piston having a larger diameter than the nozzle needle and one of ordinary skill in the art would be able to apply the teaching of GB 2316447 to the fuel injector as recited in the Jepson-type claim.

Art Unit: 3752

Allowable Subject Matter

4. Claims 15-17, 22, 23, 25-27, 29 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 13-32 have been considered but are moot in view of the new ground(s) of rejection.
